Dear Member,

Thank you for contributing to the Arbor Day Foundation and for sharing our mission to inspire people to plant, nurture, and celebrate trees. Please enjoy these free trees as a sign of our appreciation.

Your trees have arrived in a bundle; please separate them before planting. Included is a guide to help ensure proper planting conditions. Complete planting and transplanting instructions are in the enclosed *Tree Planting Guide*, and more information is available online at arborday.org/plant or by scanning the QR code below.

Because we want your planting experience to be successful, your trees are guaranteed to arrive healthy and to grow, or they will be replaced within one year of shipment.

If you need further assistance, please contact Member Services at info@arborday.org or 888-448-7337.

Best regards,

The Arbor Day Foundation Team

EASTERN REDCEDAR *Juniperus virginiana*

The **Eastern redcedar** is a slender, columnar to pyramidal evergreen tree. Mature scale-like foliage is medium green to blue-green in summer, often becoming bronze to yellow-brown in winter. The ¼" gray to bluish-green cones appear at about 10 years of age and remain on the tree through winter. The wildlife value is very high since the berry-like cones are eaten by numerous birds and mammals, and the branches provide nesting cover.

Plant 6'-12' apart for a windbreak. Try to avoid planting near apple trees, hawthorn trees, or quince bushes to control apple-cedar rust. This native juniper grows at a medium rate and can live for a few hundred years.

Number of Trees: 10

Mature Height	40'–50'
Mature Canopy Spread	8'–20'
Growth Rate	Medium (13"–24" per year)
Sun Preference	Full Sun
Soil Preference	Acidic or Alkaline, Clay, Drought-tolerant, Loamy, Moist, Rich, Sandy, Well-drained
