

New Mexico

2012 State Report

New Mexico's state tree is the Pinon.

New Mexico State Statistics

Active Arbor Day Foundation Members
in New Mexico: **6,382**

Program in New Mexico:

Tree City USA Communities: **12**
Total population served: **746,921**

Largest Tree City USA in New Mexico:
Albuquerque, population 484,246

Smallest Tree City USA in New Mexico:
San Jon, population 308

Tree Line USA Utilities: **1**

Tree Campus USA Colleges: **0**

Certified Nature Explore Classrooms: **0**

**New Mexico celebrates Arbor Day
the second Friday in March.**

Nature Explore Classrooms Are Changing the Lives of Children

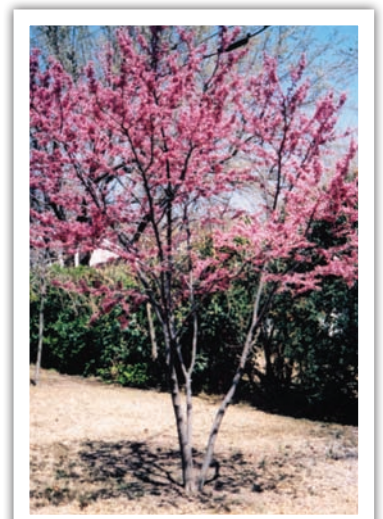

Children today spend less time outdoors and are more disconnected from nature than ever before. At the same time studies show increasing rates of childhood obesity, diabetes, and behavior challenges. Addressing the problem is the growing Nature Explore program, a collaborative project of the Arbor Day Foundation and Dimensions Educational Research Foundation. Nature Explore provides comprehensive, field-tested resources to help educators, administrators, and families make nature part of the daily lives of children – at child care centers, schools, nature centers, parks, and at home.

Nature Explore Classrooms, in spaces large and small, continue to be designed and built across the country using field-tested principles in the *Learning With Nature Idea Book* (available at natureexplore.org). In Nature Explore Classrooms, children begin to understand the natural world around them, instilling a lifelong sense of wonder and a love of nature...creating the earth's next generation of tree planters and environmental stewards. To learn more about Nature Explore Classrooms in New Mexico, please visit natureexplore.org/classrooms.

New Mexico Members Plant 77,680 Trees

The Arbor Day Foundation's dedicated members are making a difference by planting trees in their communities across the United States. Our 6,382 New Mexico members helped plant more than 77,680 trees across the state last year.

Helen Troszczewski, a loyal member from Las Cruces, New Mexico, has been planting membership trees since 1989. Helen shared with us a photo of one of her favorite trees. With wonderful, dedicated members like Helen, New Mexico will always have a strong and majestic tree presence.

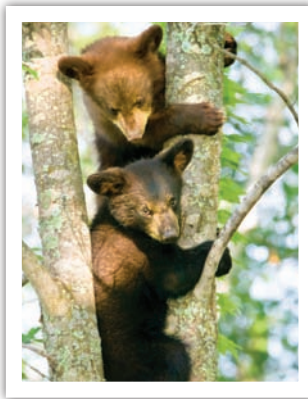

Helen's thriving redbud tree.

Our State and National Forests are National Treasures

From coast to coast, they are more than our national forests. They are national treasures. They thrill us with towering majesty and inspire us with breathtaking beauty. They provide wood for our homes, habitat for wildlife, clean air, and drinking water for millions of us.

But, in recent years, record wildfire seasons have destroyed millions of trees in forests around the country. Many areas have burned so severely that replanting is necessary. Yet much of the U.S. Forest Service budget has been diverted to simply fighting these massive fires, with much less funding left for replanting. The Forest Service has identified a backlog of more than one million acres of America's national forests that need to be replanted. And each year, with every wildfire, storm, or insect epidemic, the backlog steadily increases.

Our forests are our future. And you can help protect them... one tree at a time.

Tree Campus USA

The Tree Campus USA program recognizes college and university campuses that:

- Effectively manage their campus trees.
- Develop connectivity with the community beyond campus borders to foster healthy urban forests.
- Strive to engage their student population utilizing service learning opportunities centered on campus, and community forestry efforts.

Colleges and universities can be recognized as a Tree Campus USA college by meeting five standards developed to promote healthy trees and student involvement. By meeting the annual standards and being recognized as a Tree Campus USA college, the campus not only benefits the environment but it instills pride in the students, faculty, and community.

New Mexico Tree City USAs Support Community Forestry

The Arbor Day Foundation's Tree City USA® program encourages, supports, and strengthens effective urban and community forestry programs in diverse communities nationwide through recognition, education, and publicity. From the humble beginning of the program 36 years ago, it has grown to be the leading community forestry recognition program in the country, with more than 3,400 designated Tree City USAs across America.

Tree City USA is thriving in New Mexico because of the strong partnership between the Arbor Day Foundation and the New Mexico State Forestry Division. New Mexico boasts 12 certified Tree City USA communities. Last year, New Mexico Tree City USAs spent a combined total of \$2,833,523 on their urban forestry budgets benefiting the more than 740,000 New Mexico residents who live in those communities. The dedication of New Mexico's urban and community foresters, city officials, and citizens to planting and caring for trees in their cities and towns helps increase energy savings, clean the air and water, and beautify the entire state.
