2473- 10 Norway Spruces

Dear Member,

Thank you for contributing to the Arbor Day Foundation and for sharing our mission to inspire people to plant, nurture, and celebrate trees. Please enjoy these free trees as a sign of my appreciation.

Your trees have arrived in a bundle; please separate them before planting. Included is a guide to help identify your plants and ensure proper planting conditions. Complete planting and transplanting instructions are in the enclosed *Tree Planting Guide*, and more information is available online at arborday.org/planting.

Because we want your planting experience to be successful, your trees are guaranteed to arrive healthy and to grow, or they will be replaced within one year of shipment.

If you need further assistance, please contact Member Services at info@arborday.org or 888-448-7337.

Best regards,

Cynthia A. Allgood
Procurement

NORWAY SPRUCE *Picea abies*

The **Norway Spruce** is a familiar sight throughout the United States. Growing in a pyramidal form, the young branches grow upward, and as the tree matures, lower branches droop and all branches assume a slight upward sweep. Secondary branches give it a graceful appearance. The stiff, dark green needles are retained on the tree for several years before dropping. Cones 4"-6" long are formed around age 30. The seeds and tender foliage are eaten by birds and mammals, while lower branches offer protective cover for larger animals.

Recommended windbreak spacing is 6'-13' between trees and 16'-25' between rows. For a hedge, shear the new shoots while the year's growth is still soft.

Number of Trees: 10

Mature Height	40'-60'
Mature Canopy Spread	25'-30'
Growth Rate	Medium (13"-24" per year) to Fast (25" or greater per year)
Sun Preference	Full Sun
Soil Preference	Acidic, Clay, Drought-tolerant, Loamy, Moist, Sandy, Well-drained
